

Washington State
County Road Administration Board

2004 Annual Report

Prepared for the
Legislative Transportation Committee and
The Washington State Transportation Commission

Special thanks to Franklin, Garfield, Lewis, Pierce, Skamania,
Spokane and Walla Walla Counties for their contributions to this report.

December 31, 2004

The Honorable Mary Margaret Haugen
Washington State Senator
Chair, Senate Highways and Transportation Committee

The Honorable Ed Murray
Washington State Representative
Chair, House Transportation Committee

Dear Senator Haugen and Representative Murray:

In accordance with the requirement of law, the Washington State County Road Administration Board presents to the legislature this report of the activities of this agency for the year 2004. CRAB staff continues to promote the integration of engineering, information technology, and grants administration among the counties of the state. We believe this report will accurately indicate to you the effectiveness of that effort.

The Board and its staff remain steadfast in their commitment to achieving your legislative mandates to provide statutory oversight of the state's thirty-nine county road departments, and in so doing, to provide to you and to the people of this state the assurance that these counties' operations remain accountable in their stewardship of public assets and public trust.

Respectfully submitted:

Don Scheibe, CRABoard Chairman

Jay P. Weber, Executive Director

County Road Administration Board

Chairman Don Scheibe, Asotin County Commissioner	2006
Vice-Chairman Dean Burton, Garfield County Commissioner	2007
Tim Snead, Grant County Commissioner	2005
Judie Stanton, Clark County Commissioner	2005
Robert Breshears, P.E., Lincoln County Engineer	2005
Patty Lent, Kitsap County Commissioner	2006
Brian Stacy, P.E., Pierce County Engineer	2006
David Carey, Walla Walla County Commissioner	2007
Jim Whitbread, P.E., Stevens County Engineer	2007

County Road Administration Board Staff

Executive Director, Jay Weber

Executive Assistant, Karen Pendleton

Administration	Toni Cox, Engineering Technician
	Rhonda Mayner, Secretary

Deputy Director, Walter Olsen, P.E.

Engineering	Alan King, P.E., Intergovernmental Policy Manager
	Randy Hart, P.E., Grant Programs Manager
	Don Zimmer, P.E., Inventory Systems Manager
	Larry Pearson, P.E., Maintenance Programs Manager

Assistant Director, Steven Hillesland

Technology	Daniel Dickson, Systems Manager
	Jim Ayres, P.E., Design Systems Engineer
	Jim Oyler, Support Specialist
	Kathy O'Shea, Database Development Specialist

From the Executive Director

This annual report of the Washington State County Road Administration Board for the year 2004 shows basically who we are at CRAB, what we do here, and how our administrative services and grants programs foster a better, more efficient and safer road system throughout the thirty-nine counties of the state. It is not possible to prepare these annual reports without noticing certain trends as they develop over time. It is just such a trend to which I would like to call your attention this year.

The two principal sources of county road fund monies are the motor vehicle fuel tax and the local property tax. Both sources are directed toward road purposes and are constitutionally and statutorily protected for those uses. Traffic policing and patrol are themselves road purposes and the local property tax authority for roads may be legally shifted to general government purposes by action of the county legislative authority. While these actions are fully legal, they do result in a diminished capacity from which to address the traditional functions of maintenance and construction of the county road system. Current data indicate that it is more and more difficult to balance county current expense budgets without increased levels of diversion of maintenance and construction dollars to traffic policing and patrol or without shifting levy authority from county road for general government needs and purposes.

It is understood that the county road system does not function in a vacuum and we do not mean to suggest that general government

purposes are not vitally important. Still, it is equally important to understand that a trend of this sort cannot and does not continue without negative impacts to the surface transportation system. We also need to recognize that these impacts are long term in nature and will directly impact the economies of the regions in which they occur and that of the state as well.

It is also well indicated that this trend has not occurred due to a lack of due diligence nor without the best efforts of local authorities to avoid it. All evidence shows us this situation is upon us more from a lack of funding capacity and funding alternatives than from any other cause. The near-term effect will be that counties will have greater difficulty capitalizing and managing the cash flow demands of construction projects and maintenance of the road system generally, and the arterial system particularly will be deferred or conducted at a lower level of service. The long term result will be a deteriorated system, with a growing price tag to remedy, and a more seriously constrained financial position from which to deal with it.

This situation, while seriously important, is not a system failure nor need it be. There is time to seek revenue and management solutions which will protect and build upon the enormously successful investments in transportation which the citizens of the state have already made. The County Road Administration Board stands ready to assist the counties and the legislature in any way we can toward that end.

Engineering Services

The Engineering Services Division, under the direction of Deputy Director Walt Olsen, includes Intergovernmental Policy Manager Al King, Maintenance Program Manager Larry Pearson, Grant Programs Engineer Randy Hart, and Inventory Systems Manager Don Zimmer. This small staff, most of whom hold Professional Engineer licenses, is directly responsible for:

- Functions related to the administration of the Rural Arterial Program, the County Arterial Preservation Program, and the Capital Ferry Program,
- Functions related to the maintenance of the County Road Log and the computations and updates to the distribution of the counties' share of the motor vehicle fuel tax,
- Management of the reports and other information necessary for recommendations related to the Annual Certificate of Good Practice for each county.
- Guidance and research on statutory and regulatory issues affecting county road and public works departments,
- Assistance in representation of county engineer interests on a variety of state-level committees and task forces,
- Design and traffic engineering assistance to counties as requested, including consultant selection assistance,
- Liaison services on behalf of county engineers with various state agencies, especially the H&LP Division of WSDOT.

CRAB acts as a clearinghouse for information requests, questions, and the exchange of ideas. With an emphasis on good communication, Engineering Services staff has worked with state transportation officials, resource agencies personnel, and public works departments as they strive to meet the transportation needs of their counties.

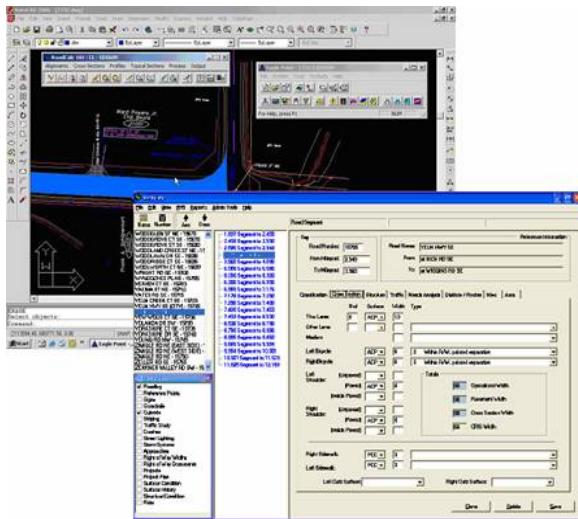

Beginning in 2001, a major focus of the Engineering Services Division was placed on developing a Maintenance Management System and assisting the counties in its implementation. The intent of the maintenance management initiative is to increase the use of formal maintenance management systems in county maintenance operations rather than to tell counties how to perform their maintenance activities. The Maintenance Management Program moved into the implementation phase in 2003 and a draft Maintenance Management manual was prepared. It is intended to provide initial support and guidance for implementation and operation of a formal Maintenance Management System (MMS). In 2004, work began to revise the WAC for implementing Standards of Good Practice related to maintenance management and counties will be encouraged to examine their maintenance processes

A final responsibility of the Engineering Services Division is the maintenance and updating of the County Engineers' and Public Works Directors' Manual and the provision of training to County Engineers and their staffs. Two sessions were conducted in 2004 to address the recent turnover of county engineers and public works directors as well as provide an opportunity for senior staff members to understand the challenges and develop the knowledge base for possible advancement.

Information Services

The Information Services Division at CRAB is a small team of professionals dedicated to the smooth and efficient operation of this agency and to ensuring that Washington's counties continue to effectively apply current and emerging technology to the improvement and preservation of the public's investment in transportation infrastructure. The first goal is accomplished by providing a progressive, stable and secure computing environment for agency staff. The second, by developing and providing systems, training and consulting services specific to the needs of county road departments in Washington. In 2004 the Information Services team again made significant, unique and creative contributions to agency staff and to the design and management efforts of Washington counties.

An outstanding accomplishment of 2004 was the release and deployment of *Mobility* in Washington counties. *Mobility* is an application, developed by CRAB, to replace the

aging *County Road Inventory System*, used in our counties since the late 1980's. *Mobility* is a comprehensive road inventory and management system which enhances a county's ability to make quality decisions through consistent, equitable, and defensible management plans and operations. The systematic application of sound business logic, embedded in *Mobility*, ensures accountability in county road departments and assists county personnel in their compliance with reporting requirements to CRAB, the State Legislature, and federal entities. *Mobility* was deployed to nearly half of the Washington counties in 2004 and will reach the rest of the counties in early 2005. Deployment and training for *Mobility* has shown broad acceptance and enthusiasm by county personnel who are using the application. *Mobility* is a prime example of the economy-of-scale for which CRAB is well known, in that it will save the counties from spending millions on management systems that are neither as responsive to nor as specific to their needs as *Mobility*.

A mainstay in the assistance role of the CRAB Information Services team is the Design Systems program. Since 1985, Design Systems has consistently provided Washington county personnel with state-of-the-art engineering road design software, support, and training. This program has enabled county design staff to effectively collect, develop and manipulate the geometric information necessary for site design and construction planning which has contained costs, and improved productivity throughout the life of road projects.

Grant Programs

Utilizing 1.03 cents of the total 28 cents per gallon state gas tax, the County Arterial Preservation Program and the Rural Arterial Program (\$14 million and \$19 million per year respectively) make large annual contributions to the health of county arterial roads. These programs provide funding that improves

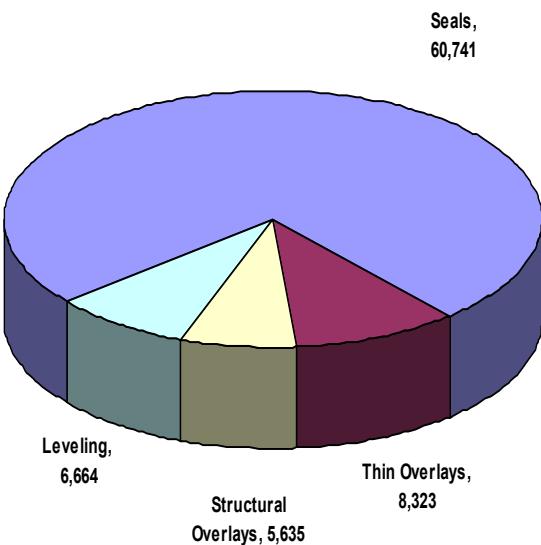

freight haul and access to agricultural markets in local areas. When projects are approved with these funds, mobility and safety needs are also addressed. The two programs compliment each other with their unique focus on different road deficiencies.

COUNTY ARTERIAL PRESERVATION PROGRAM

CAPP use is limited to preserving of the road structure, preventing costly surface and substructure failures later on. Roads fail at predictable rates, and counties are required to monitor this through an automated pavement management system in order to be eligible to

use CAPP funds. The system ensures that funds are applied to the right roads at the right time, resulting in the greatest system-wide benefit and cost savings. CRAB uses less than 3% of the revenue to administer CAPP.

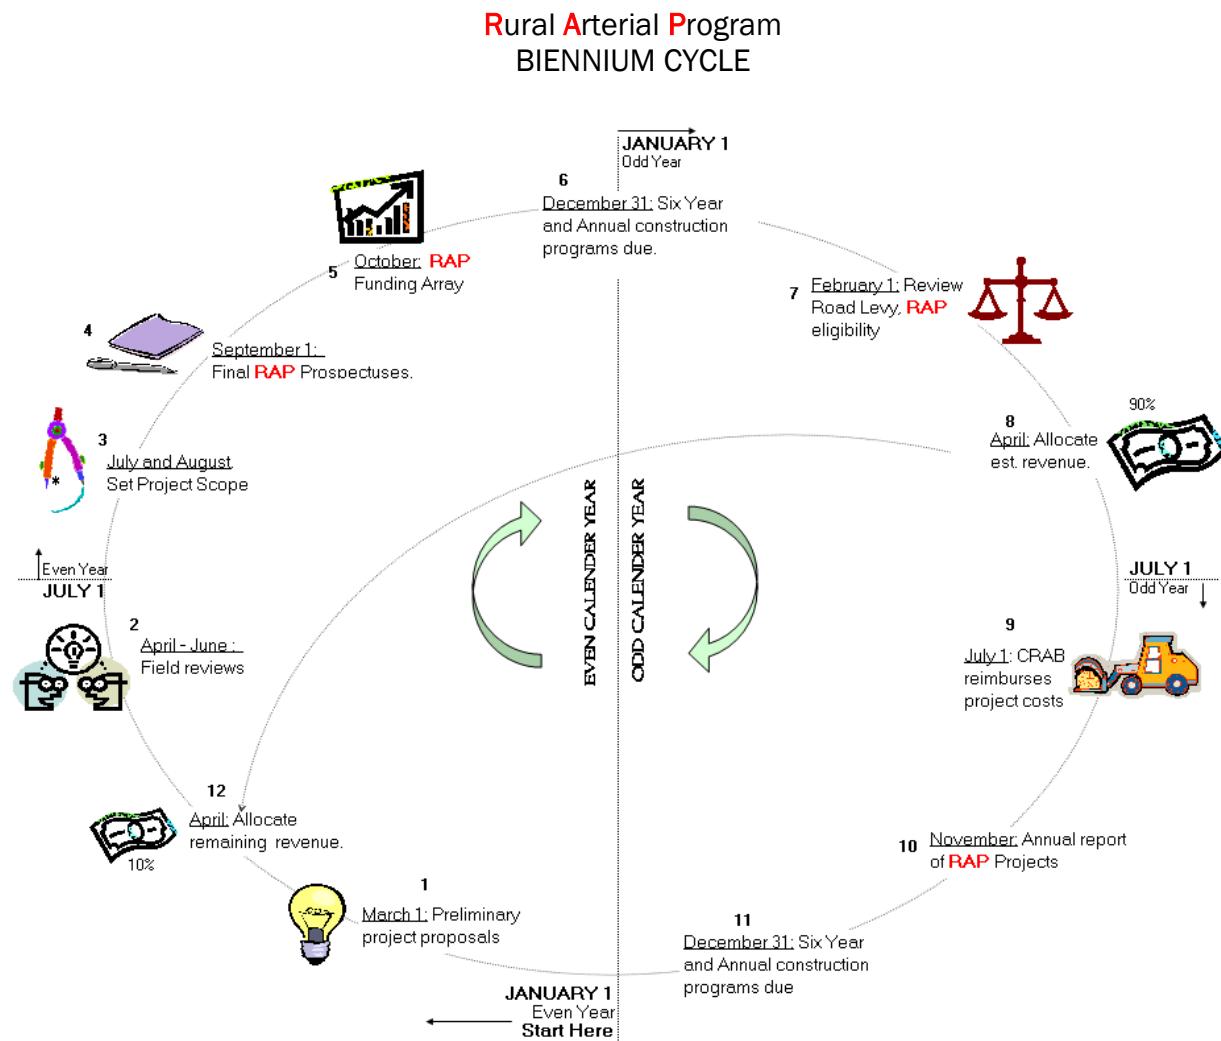

LANE MILES OF PRESERVATION WORK DONE TO DATE,
ALL FUNDS 1990 - 2003

RURAL ARTERIAL PROGRAM

Sometimes a road's failings are more than structural, and safety and capacity needs are present. This is where the RAP comes in, focusing on correcting adverse geometry, narrow widths, and safety hazards as well as major structural failure. Using less than 3% of the tax for administration, the CRABoard manages the RAP via a biennial cycle that includes:

- Project submittal
- Rating
- Determining eligibility through six year program and road levy review
- Funding approval
- Reimbursement and field review of completed projects

**Rural Arterial Program Expenditures by County
And Legislative District in 2003**

2004 GRANT PROGRAM PROJECTS

Franklin County constructs Sagehill Road Truck Climbing Lane

RAP Funds: \$630,000
Awarded in 1996

Total Project Cost: \$1,506,496

Design:
Franklin County and
J-U-B Engineers, Inc. of Kennewick

Construction:
-Canal modifications:
Apollo, Inc. of Kennewick, Washington
-Road construction:
Hilmes Construction,
of Othello, Washington

This project consisted of the acquisition of right-of-way, irrigation and canal modifications, horizontal and vertical realignment, crushed surfacing, drainage, Asphalt Concrete Pavement, the addition of a truck climbing lane and turn lanes, and illumination.

Ample room for safe passing maneuvers.

Franklin County Commissioners, in their letter of November 17, 2004 to the CRABoard, shared their sincere thanks for the RAP funding. "Without Rural Arterial Program funding, Sagehill Truck Climbing Lane would still just be on Franklin County's Wish List".

LEWIS COUNTY SUMMARY OF 2003 CAPP

Lewis County used CAPA funds judiciously in 2003 as a part of their overall pavement preservation program, funneling dollars where they were most needed. Below is a summary of their priorities and project descriptions.

PROJECT TITLE: 2003 Prelevel Paving and Thin Overlays
CRP NUMBER: 2080
PROJECT SCOPE: Lewis County's 2003 Thin Lift Overlay program addressed three priorities.

1. Pavement Surface Condition Ratings Repaving certain road surfaces that were rated at the "must repair" level.
2. Heavy Truck Usage Strengthening 4.17 miles of Big Hanaford Road.

Big Hanaford Road serves the TransAlta Steam Plant and Coal Mine from SR507. The TransAlta Company employs 850 to 900 permanent and temporary employees who travel this route twice daily. Also, four trucking companies haul quarry rock, fly ash, limestone, and gypsum every day over this route. In addition there are occasional very large over-sized loads using this route.

Big Hanaford and CAPP, a good match!

3. Designated Detour Route Arterials Upgrading road surfaces on arterials used for detours between I-5 exits.

CAPP funds strengthen Hwy 603.

Highway 603 is a designated I-5 freeway detour from exit #63 to exits #71 and #72.

Contractor Awarded: March 24, 2003
Contractor: Lakeside Industries, Inc.
Bid Amount: \$998,698.50
Project Cost: \$1,050,000.00
CAPP Funding: \$ 310,386.29

Pierce County completes 2nd phase of busy 120th Street

While phase 1 was completed in 1999, Pierce County completed phase 2 during the 2002 & 2003 construction seasons. This project provided for the widening and reconstruction of 0.83 miles of 120th Street East from 214th Avenue East to South Prairie Road East and

0.20 miles of South Prairie Road East north and south of the 120th Street East intersection. The work included construction of a stormwater retention pond, infiltration system, and other drainage improvements.

The narrow, obsolete 120th Street.

Contractor:
Ceccanti, Inc.;
Spanaway,
Washington

Funding:
RAP - \$400,000

Pierce County -
\$1,450,952

Opening sight distance and widening improve safety.

Spokane County Constructs 4.10 miles of Prairie View Road

Prairie View Road is a major East-West rural arterial linking the Town of Waverly, Highway 27, and Southeast Spokane County Grain Growers to Old Highway 195 and the rail heads for grain shipments in the Towns of Plaza and Rosalia. Since the abandonment of the railroad that served the grain centers of Waverly, Griffith and Spring Valley, Prairie View Road provides the transportation link for all the grain storage facilities in the area.

Prairie View Road was rough and narrow.

Narrow lanes and nonexistent shoulders along with sub-standard horizontal and vertical curves were unsettling to the most experienced drivers when meeting oncoming traffic in any weather. Inadequate drainage and areas of unsuitable material were the main causes of pavement deterioration.

Steelman-Duff, Inc. of Clarkston completed the 1st phase in 2002 and S.A. Gonzales Construction, Inc. of Newman Lake completed the 2nd phase in 2003.

Project cost: \$3,063,600.00
RAP funding: \$2,216,869.00

The new road is comfortable and safe to drive.

Walla Walla County replaces deficient Whitman Bridge

Located near the Whitman Mission National Historic Site in Walla Walla County, the Whitman Bridge was structurally, functionally, and hydraulically deficient with five piers in the Walla Walla River, debris built up constantly and scour of the support structure reducing the bridge's structural capacity over the years. Maintenance and inspection of the bridge was a constant and costly chore. The new two-span, 200-foot-long bridge is on an improved alignment with an increased waterway opening. The roadway width was increased from 20 feet to 36 feet.

With many piers, river borne debris was often trapped.

A wide channel to handle future flooding.

Now the Walla Walla River can pass under the bridge without missing a beat, flood or no flood.

Constructed by:
Apollo, Inc.;
Kennewick, Washington

Total Cost:
\$1,190,487.00

RATA Funds:
\$188,100.00

Garfield County Public Works replaces rough section of Gould City – Mayview Road

The project involved constructing 2.10 miles of new county road, replacing 3.37 miles of very narrow and curvy roadway and failed pavement. These conditions combined to make for slow and dangerous travel. The adverse alignment and drainage made maintenance far too expensive to continue. County residents and farmers often chose alternative routes in order to avoid traveling this section of road. Since the improvements however, it has become the primary access road for most of the Northern county residents.

The new road required extensive grading.

Total Project Cost: \$2,085,392

RATA Funding: \$1,876,853

County Funding: \$208,539

Design Consultant: Progressive Engineering; Lewiston, Idaho

Prime Contractor: Westway Construction; Airway Heights, Washington

Skamania County improves school access, pedestrian and vehicle movements on Wahhougal River Road

This project was the final piece of a 5-mile improvement done over a 6-year period. This section emphasized safety and mobility due to a traffic volume of 2000 cars a day and a school within the project that doubled in size after a middle school was added.

Improvements include:

- Lane widening
- Increased site distance
- Left turn lane for the school approach
- 5 foot shoulder to accommodate pedestrians
- Crosswalks
- Storm drainage
- Fish passage culvert

Road Type:

Major Collector

Total RATA Funds:

\$237,960

Total Project Cost:

\$378,138

Completion Date:

August 12, 2003

Contractor:

George Schmidt and Sons, Inc. of Washougal, Washington
